To Whom it May Concern:

I recently completed my search and purchase of my first home with the gentle, expert guidance of Mr. Wolf Puls. He has made this journey one of the best experiences of my life and one of the easiest transitions to make.

His work ethic, team spirit and leadership as well as his commitment to honoring what the client wants and needs are stellar. He had wonderful suggestions, made honest and insightful observations and had only my best interest at heart during the complete process.

We worked very well together, had a great time during the hunt and even laughed a time or two regarding some of the colorful homes we saw. Not once did I feel uncomfortable or feel like I made a mistake in choosing him to walk with me through all the phases of buying a home.

Rarely do you meet someone who makes you feel like you have known them for years and you can trust them with something as important as your home. Wolf does that. He obviously loves what he does and he enjoys helping people see their dreams of owning a home come to fruition.

I would absolutely recommend Wolf to anyone looking seriously for a home. He will take all the time needed and make sure each step is thoroughly explained and understood along the way. He also has a complete list of handymen, locksmiths, and whomever else you may need for repairs, inspections or painting.

Sincerely,

Jean A. Guthrie
